

# Digital Lock [E81]

## Features:

- **Touch Screen Keypad** – The Touch Screen Keypad Has NO Mechanical Button Which Means NO Trace of your Secret PIN Code.
- **Low Power Consumption** – Unlock Your Door Up To 10,000 Times With One Set of (4x) AA Batteries. We Recommend The Batteries Are Changed Every 12 Months.
- **Outdoor Weather Resistant Keypad** – They Keypad Is Designed To Withstand Out Weather Conditions And Also Has IP Protection 5.5.
- **Fake PIN Code** – Prevent Others From Identifying Your PIN Code During Access, The Fake PIN Code Function Confuses The Onlookers But At The Same Time Allows You To Enter.
- **User Codes And Setting Remain If Batteries Are Replaced** – The settings and codes will remain programmed in the lock in the even the batteries are depleted.
- **Low Batteries Warning** – When battery reaches critical level, a warning light will come on reminding you to change the batteries.
- **External Power Supply** – Either Use Key Or Power Bank (Supply Separately) In The Event Of Batteries Flat.
